Environmental Policy

In order to minimise the effect of K C Engineering's impact on the environment, the company operates an environmental management system (EMS), in accordance with the framework provided by ISO 14001:2004. This EMS is to be externally audited by a recognised body. K C Engineering is committed to continually reduce and prevent pollution, in all forms to the environment that is caused directly or indirectly by its operations.

When considering the impact of K C Engineering on the environment the key areas of focus are categorised into the following areas:

- Energy consumption
- Solid and liquid hazardous waste
- Airborne pollution
- Recyclable waste streams
- Process efficiency
- Travel, freight and logistics
- Supply chain

In some of these areas there are local, national and international legal requirements to which the company must adhere. These will be respected and enforced at all times. The company will ensure as far as reasonably possible to ensure any changes in these requirements are identified and implemented. In order to satisfy the framework provided in ISO 14001:2004 a team of key staff will set, review and implement environmental objectives, targets and actions. Key roles in the business form this Environmental Team ensuring awareness and compliance all the way down from senior management.

On an annual basis all objectives, targets and measures will be reviewed by the environmental team.

The environmental team will take responsibility for ensuring this policy, the objectives and targets are communicated all staff of K C Engineering. Measurable parameters relating to the environmental impact (pollution) of K C Engineering will be regularly updated and posted within the premises.

This Environmental Policy will be published on the company's website and on request will be made available to any interested party.

Keith Chester
Managing Director
